Every time I want to open .NETCORE, Go from terminal and type 'dotnet' because for first time I try NETcore on

Fedora Linux for

Compare microservices performance in Nodejs and NetCore in Different Containers and use Docker with

some OS and the result

was O.K for dotnet.

I used V.S for Microsoft Development, At least 14 years from vs2006 and I Believe C# + dotnet on any

container.

In .NET for 3 years I be a KISS programmer, Then for 10 years I was DRY C# Developer then for finding

TRUTH

I Go to try Linux servers and Open source Databases as YANGI one.

I have some experienced with smart agile software like SmartSheet for project management and some

local versions

It works for team working.

I am very familiar with (Node) JS based software like React, Angular, …And have good experienced in SPA

frontend design with Framework7 for Android, IOS, WEB, PWA and publish at least 5 APP with web layouts

in AppMarkets.
